**Completion Date**  
2010

**Key Personnel**  
D. K. Nasland, PLS, PE;  
Director of Surveys  
John Winn, PLS;  
Survey Project Manager

### Project Summary

Nasland Engineering provided boundary with a ground and aerial Topographic survey using CCS NAD83 control for the Naval Training Complex at the south end of the Silver Strand. Survey completed using GPS and conventional methods with emphasis on the location of existing utilities. The survey was used as base mapping in the development of alternative concepts and a current situation report for an updated infrastructure plan. Plat of results was provided in hardcopy and CAD 2007 format for use by other disciplines.
