Project Summary

The project was located in Coronado on the north side of 1st Avenue, west of Orange Avenue, east of North Island N.A.S., fronting San Diego Bay. Nasland Engineering provided boundary with a ground and aerial Topographic survey using SDUPD based control for a residential area abutting the coastline on the north side of Coronado Island. Survey completed using GPS and conventional methods and incorporated into a hydrographic survey provided by the Port District. Survey to be used as an attorney work product for litigation regarding coastal erosion. Plat of results was provided in hardcopy and CAD 2007 format for use by other disciplines.
